EzGo User Manual

Getting Started

Install the free Molnus APP:

1. Make sure you have a data package with either your smartphone or tablet or a Wifi connection.

2. Search for the Molnus App on the APP store and install the App on your smartphone or tablet.

Start the camera:

To get started, you need to supply the camera with batteries and a SIM-card that has internet access.

1. Turn the camera ON, use the ON/OFF switch to turn the camera ON.

2. Scan the QR code on the screen with your phone.

3. The characters 'Registering' will be displayed under the QR code. The backend will check, and if the camera successfully connects to the Molnus, it will display 'registered successfully.'

4. After the camera connects successfully, it will enter Hunting mode.

For more details please refer to the Molnus website:
